How It Works

Four simple steps to comprehensive compliance monitoring

Upload Documents

Securely upload your organizational documents for passive monitoring

AI Clause Extraction

NLP-based segmentation identifies critical clauses and provisions

Risk Detection

Map findings to compliance frameworks with risk scoring

Generate Reports

Comprehensive audit reports with explainable findings

Enterprise-Grade Features

Built for compliance teams who need reliable, explainable AI monitoring

Read-Only Ingestion

Non-invasive document analysis that never modifies your original files

NLP Clause Segmentation

Advanced natural language processing for precise clause identification

Explainable Findings

Clear evidence and reasoning behind every compliance assessment

Risk Scoring

Categorized risk levels: Low, Medium, High, and Critical assessments

Multi-Framework Support

Comprehensive coverage for GDPR, HIPAA, SOX, and other frameworks

Real-Time Analysis

Instant document processing with sub-30 second analysis times

Security & Privacy First

Enterprise-grade security architecture designed for the most sensitive compliance environments.

Read-Only Architecture

Zero write permissions ensure your documents remain completely unmodified

Encrypted Storage

End-to-end encryption with enterprise-grade key management

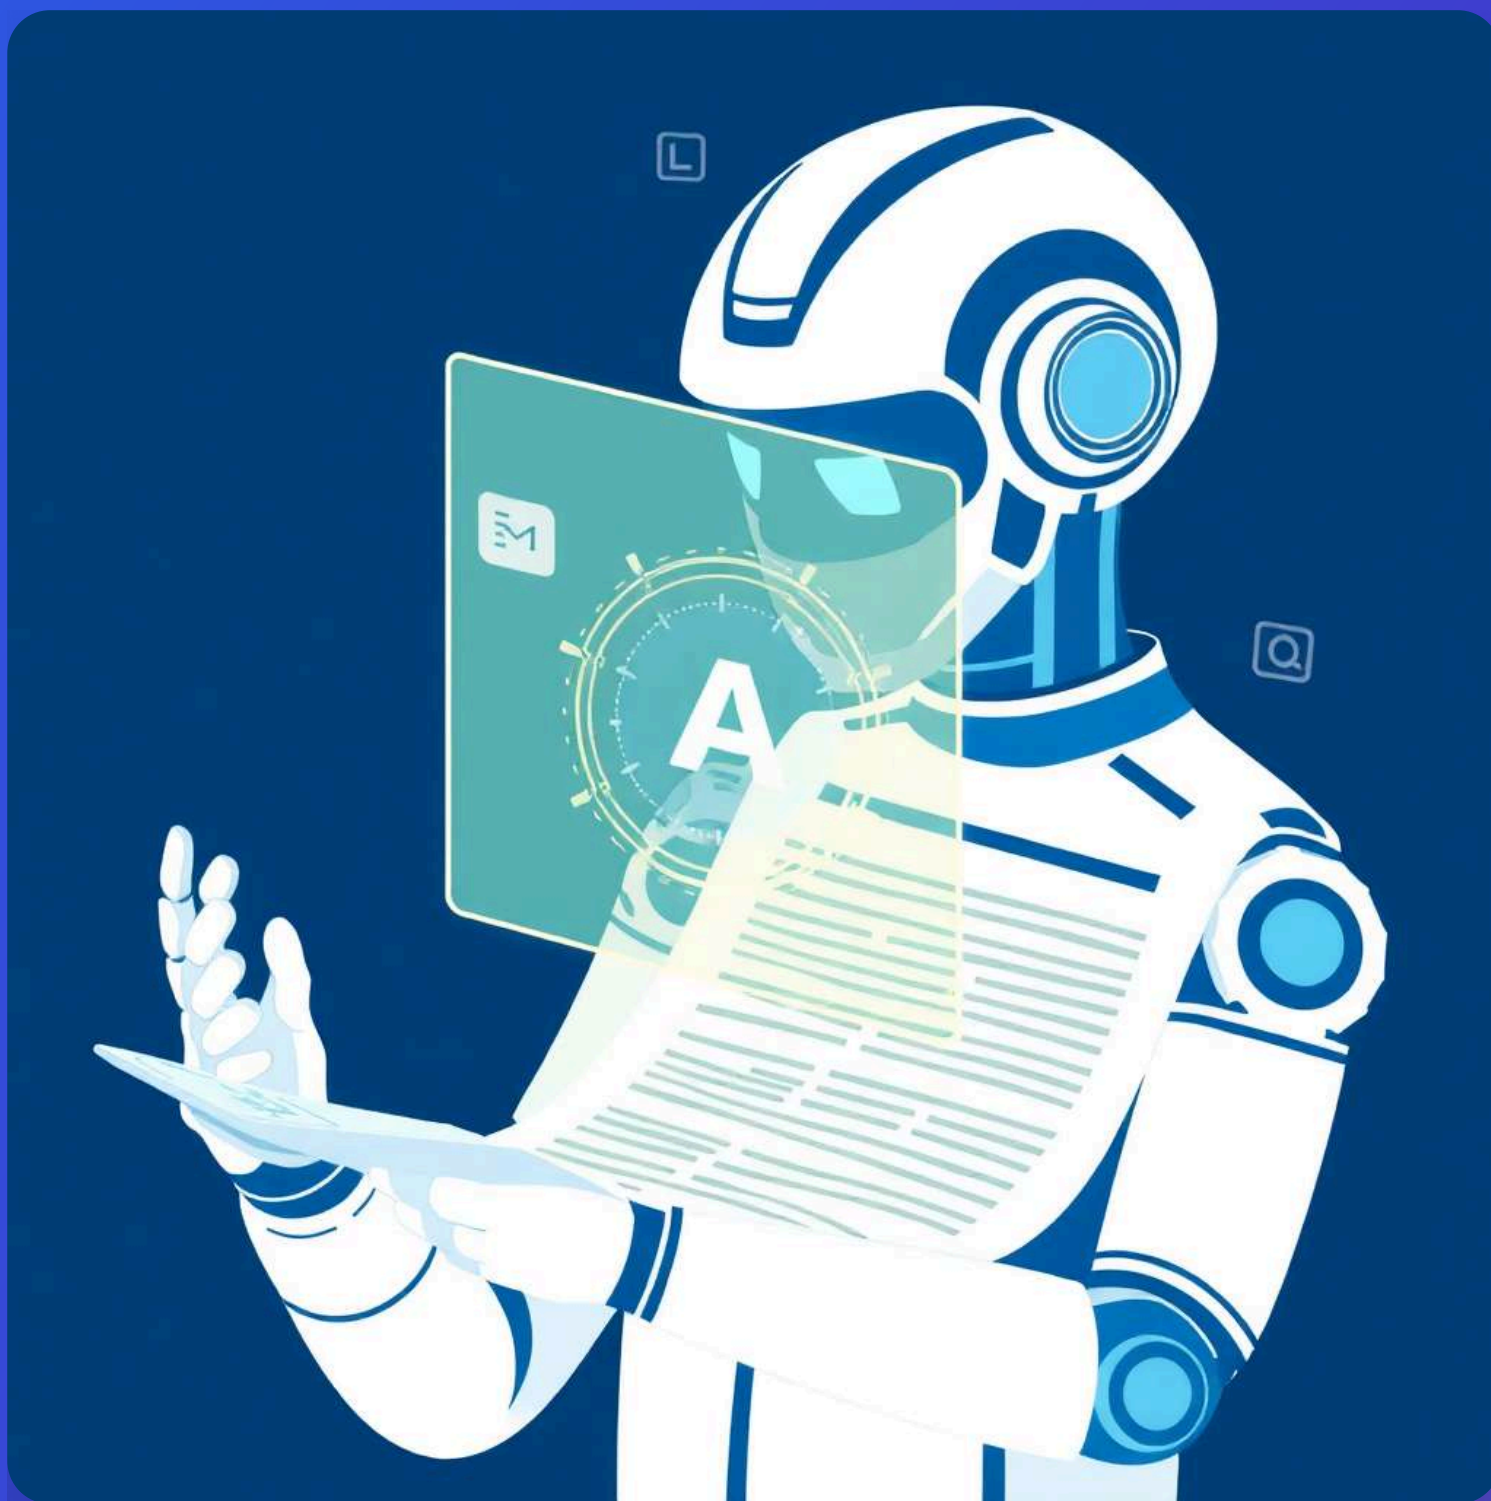

Zero Modification Policy

Passive monitoring maintains complete document integrity

Enterprise Compliance AI Dashboard

Intelligent document analysis and compliance monitoring powered by advanced AI technology.

Read-Only System

We never modify your documents. Our AI only reads and analyzes for compliance insights.

Mark as Reviewed

Unencrypted Personal Data Storage

Customer PII stored without encryption in violation of GDPR Article 32

Identified Risk Clause

"Personal data shall be processed in a manner that ensures appropriate security of the personal data, including protection against unauthorised or unlawful processing and against accidental loss, destruction or damage, using appropriate technical or organisational measures (integrity and confidentiality)."

Evidence

⚠️ Database Configuration Analysis

Automated scan detected customer database "user_profiles" storing plaintext personal information including:

• Full names

• Email addresses

• Phone numbers

• Home addresses

Location: /database/user_profiles/personal_data

Legal Reference

GDPR Article 32 - Security of Processing

Taking into account the state of the art, the costs of implementation and the nature, scope, context and purposes of processing as well as the risk of varying likelihood and severity for the rights and freedoms of natural persons, the controller and the processor shall implement appropriate technical and organisational measures...

Regulation: GDPRArticle: 32Maximum Fine: €20M or 4% of revenue
